

1) Find names of all Juniors who are enrolled in a class taught by I. Teach.

$$\textcircled{1} \rho \left(\sigma_{\substack{S.snum = \\ E.snum}} (S \times E) \right) \rightarrow T_1 \quad \textcircled{3} \rho \left(\sigma_{\substack{C.Fid = \\ F.Fid}} (T_2 \times F) \right) \rightarrow T_3$$

$$\textcircled{2} \rho \left(\sigma_{\substack{E.cname = \\ C.name}} (T_1 \times C) \right) \rightarrow T_2 \quad \textcircled{4} \pi_{\substack{S.sname \\ S.level = JR \wedge \\ F.frame = I.Teach}} \left(\sigma_{\substack{S.level = JR \wedge \\ F.frame = I.Teach}} (T_3) \right)$$

2) Find the age of the oldest who is either a History major or enrolled in a class taught by I. Teach.

Using T_3 from Q1

$$G \left(\sigma_{\substack{S.major = History \vee \\ F.frame = I.Teach}} (T_3) \right)$$

max(s.age)

3) Find the names of all classes that either meet in R128 or have 5 or more students.

$$\textcircled{1} \rho \left(\sigma_{\substack{C.name = \\ E.cname}} (C \times E) \right) \rightarrow T_1$$

$$\textcircled{2} \rho \left(c.name, c.room \ G_{\substack{cnt(snum) \geq 5}} (T_1) \right) \rightarrow T_2$$

$$\textcircled{3} \pi_{c.name} \left(\sigma_{\substack{c.room = R128 \vee \\ SC \geq 5}} (T_2) \right)$$

4) Find the names of all students enrolled in two classes which meet at same time

Using T_2 from Q1

$$\textcircled{1} \rho \left(s.sname, s.snum \ G_{\substack{cnt(distinct C.meets-at) \rightarrow dcnt, \\ cnt(C.meets-at) \rightarrow cnt}} (T_2) \right) \rightarrow T_3$$

$$\textcircled{2} \pi_{s.sname} \left(\sigma_{T_3.dcnt \neq T_3.cnt} (T_3) \right)$$

5) Find the names of faculty members which teach in every room in which a class is taught

$$\textcircled{1} P(\pi_{C.\text{room}, C.\text{fid}}(C)) \rightarrow T_1$$

$$\textcircled{2} P(\pi_{C.\text{room}}(C)) \rightarrow T_2$$

$$\textcircled{3} P(T_1 / T_2) \rightarrow T_3$$

$$\textcircled{4} P\left(\bigcap_{\substack{T_3.\text{fid} = \\ F.\text{fid}}} (T_3 \times F)\right) \rightarrow T_4$$

$$\textcircled{5} \pi_{F.\text{fname}}(T_4)$$

6) Find names of faculty members who's combined enrollment for all classes is < 5 .

$$\textcircled{1} P\left(\bigcap_{\substack{C.\text{name} = \\ E.\text{name}}} (C \times E)\right) \rightarrow T_1$$

$$\textcircled{2} P(C.\text{fid} \rightarrow_{\substack{\text{cnt}(C.\text{name}) \\ \rightarrow \text{sent}}} (T_1)) \rightarrow T_2$$

$$\textcircled{3} P\left(\bigcap_{T_2.\text{sent} < 5} (T_2)\right) \rightarrow T_3$$

$$\textcircled{4} \pi_{\substack{F.\text{fname} \\ F.\text{fid}}} \left(\bigcap_{T_3.\text{fid} =} (T_3 \times F)\right)$$

7) Print the level and average age of each level

$$\textcircled{1} P\left(\substack{S.\text{level} \\ \rightarrow \text{level}} \rightarrow_{\substack{\text{avg}(S.\text{age}) \\ \rightarrow \text{avg-age}}} (S)\right) \rightarrow T_1$$

$$\textcircled{2} \text{Print}(T_1)$$

8) Q7 + except JR

$$\textcircled{1} P\left(\substack{S.\text{level} \neq \text{JR} \\ \rightarrow \text{level}} (S)\right) \rightarrow T_1$$

$$\textcircled{2} P\left(\substack{T_1.\text{level} \\ \rightarrow \text{level}} \rightarrow_{\substack{\text{avg}(T_1.\text{age}) \\ \rightarrow \text{avg-age}}} (T_1)\right) \rightarrow T_2$$

$$\textcircled{3} \text{Print}(T_2)$$

9) For each faculty member that has taught classes only in R128, print name and class count.

$$\textcircled{1} P\left(\bigcap_{\substack{F.\text{fid} = \\ C.\text{fid}}} (F \times C)\right) \rightarrow T_1$$

$$\textcircled{2} P(F.\text{fid} \rightarrow_{\substack{\text{cnt}(C.\text{name}) \\ \rightarrow \text{cnt}}} (T_1)) \rightarrow T_2$$

$$\textcircled{3} P\left(\bigcap_{\substack{F.\text{fid} = \\ C.\text{fid} \wedge \\ C.\text{room} = \\ R128}} (F \times C)\right) \rightarrow T_3$$

$$\textcircled{4} P(F.\text{fid} \rightarrow_{\substack{\text{cnt}(C.\text{name}) \\ \rightarrow \text{cnt}}} (T_3)) \rightarrow T_4$$

$$\textcircled{5} P\left(\bigcap_{\substack{T_2.\text{cnt} = \\ T_4.\text{cnt} \wedge \\ T_2.\text{fid} = \\ T_4.\text{fid}}} (T_2 \times T_4)\right) \rightarrow T_5$$

$$\textcircled{6} \pi_{\substack{F.\text{fname}, \\ T_5.\text{cnt}}} \left(\bigcap_{\substack{F.\text{fid} = \\ T_5.\text{fid}}} (F \times T_5)\right)$$

10) Find names of students enrolled in max# classes

$$\textcircled{1} \rho(E, snum \rightarrow G_{\substack{\text{cnt}(E, snum) \\ \rightarrow \text{count}}}(E)) \rightarrow T_1 \quad \textcircled{2} \rho(G_{\substack{\text{max}(T_1, \text{count}) \\ \rightarrow \text{max}}}(T_1)) \rightarrow T_2$$

$$\textcircled{3} \rho\left(\sigma_{\substack{T_1, \text{count} = \\ T_2, \text{max}}}(T_1 \times T_2)\right) \rightarrow T_3 \quad \textcircled{4} \pi_{s, \text{sname}}\left(\sigma_{\substack{s, \text{snum} = \\ T_3, \text{snum}}}(S \times T_3)\right)$$

11) Find names of students not enrolled in any classes

$$\textcircled{1} \rho(\pi_{E, snum}(E)) \rightarrow T_1 \quad \textcircled{2} \rho(\pi_{S, snum}(S)) \rightarrow T_2$$

$$\textcircled{3} \rho(T_2 - T_1) \rightarrow T_3 \quad \textcircled{4} \pi_{s, \text{sname}}\left(\sigma_{\substack{s, \text{snum} = \\ T_3, \text{snum}}}(S \times T_3)\right)$$

12) For each age value that appears in students, find the level value that appears most often.

$$\textcircled{1} \rho(s, \text{age}, s, \text{level} \rightarrow G_{\substack{\text{cnt}(s, \text{age}, s, \text{level}) \\ \rightarrow \text{cnt}}}(S)) \rightarrow T_1$$

$$\textcircled{2} \rho(T_1, \text{age} \rightarrow G_{\substack{\text{max}(T_1, \text{cnt}) \\ \rightarrow \text{max}}}(T_1)) \rightarrow T_2$$

$$\textcircled{3} \pi_{\substack{T_1, \text{age}, \\ T_1, \text{level}}} \left(\sigma_{\substack{T_1, \text{cnt} = \\ T_2, \text{max} \wedge \\ T_1, \text{age} = \\ T_2, \text{age}}}(T_1 \times T_2) \right)$$

age	level	cnt
